

SHARP SURVEY

The Sharp Survey is administered every other year to students in grades 6, 8, 10, 12 in most public and certain charter districts across Utah. The survey is designed to measure adolescent substance use, anti-social behavior, and the risk and protective factors that predict these adolescent problem behaviors. On an annual basis, and as part of the beginning of year registration process, an “opt in” form will be provided for the parent. Parents filling out this “opt in” form gives the Millard School District permission to administer the survey to their child. You can read more information at:
