MSD: Coordination with Activity Drug Testing and Eligibility Rules

A report or investigation under this policy is separate from the District's student activity drug testing program. Random or activity-based drug testing results are used for determining extracurricular eligibility and are not used for any other disciplinary purpose. Test results under that program shall not be disclosed to law enforcement or juvenile authorities absent a valid and binding subpoena or other legal process issued by a court of competent jurisdiction.

The activity drug testing program does not replace the reporting duties in this policy. When information known to or reported to a school employee alleges a drug possession offense on school grounds when school is in session or at a school-sponsored activity, the employee and principal shall follow this policy, regardless of whether the student is also subject to extracurricular eligibility consequences, activity standards, or drug testing procedures.
