MSD: Coordination with Activity Eligibility and Non-Enrolled Student Participation Policies

Students who participate in District athletic activities remain subject to the District activity eligibility, attendance, citizenship, transportation, student conduct, and activity-standard policies that apply to the activity. Charter, online, home school, private school, scholarship, or other non-enrolled students who seek to participate in a District activity are governed by the applicable non-enrolled student participation policies, including FFD and the Board-approved 5100 framework. Nothing in those participation policies waives the requirements of this policy, UHSAA rules, the School Activity Eligibility Commission process, or applicable state law governing sex-designated athletic facilities, programs, and events.
