MSD: Facility Access, Privacy Plan, and Safety Coordination

When a privacy plan, staggered schedule, private access arrangement, or faculty/staff restroom access arrangement is developed under this policy, school administration shall coordinate implementation with building supervision, student safety, bullying/harassment response, student records privacy, and parent communication procedures. Any local arrangement shall be documented in a manner that protects student privacy, is shared only with personnel who have a legitimate educational or operational need to know, and does not alter the student official educational records except as authorized by law and District student records policy.
