MSD: Recognized Residency Agreements and Local Program Access

Student residency for District attendance may be recognized as part of a written or recognized agreement between another school district and Millard School District, including arrangements designed to increase student academic options. Examples preserved from the current local policy include students from West Desert High School in the Tintic School District attending Delta High School and students attending a Millard secondary school for a UHSAA-governed athletic or extracurricular program that is not offered at the student's school of home residence.

A student accepted under this local provision remains subject to applicable UHSAA requirements, District eligibility standards, program capacity, transportation rules, fee requirements, and all Board policies governing student conduct, attendance, activities, and records. This subsection does not create a general right to open enrollment beyond what is allowed under Utah law and this policy.
