MSD: Additional Definitions for Charter, Online, Home, Private, and Credit Review

For purposes of District relationships with non-District instructional settings, Millard School District preserves the following additional local definitions and operating terms: accreditation means official recognition under Cognia National Accreditation Association standards or Utah State Board of Education standards; a charter school is a publicly funded school operating independently of the established district public school system; an online school is a formally constituted public school offering full-time education primarily over the internet; and the Statewide Online Education Program (SOEP) is treated as a program through which the student remains fully enrolled in Millard School District for all credit hours taken, whether provided directly by the District or through SOEP.

The District also preserves the local Credit Evaluation Committee concept. The Superintendent may appoint a review committee consisting of the District Curriculum Director, a principal, a counselor, and others as determined by the Superintendent to review credit requests from non-accredited schools or outside instructional settings.
