MSD: Coordination with Home School and Dual Enrollment

Home-centered, school-supported enrollment is distinct from home school attendance excused under Policy FBB and from private or home school dual enrollment under Policy FBBA. Unless the Board separately authorizes home-centered school enrollment by resolution and establishes applicable standards, home school notices and dual enrollment requests shall continue to be processed under Policies FBB and FBBA.

A family's submission of a home school notice does not create home-centered school enrollment. A dual enrolled private or home school student is not a home-centered school enrollment student unless the Board has authorized that enrollment option and the student has been approved under the standards adopted for that option.
