MSD: Educational Services for Students in Private Human Services Programs

When Millard School District is established as the alternative district of residence for a student attending a private human services program, the student is entitled to educational services from the District at District facilities as determined by the District. The District is not required to provide educational services on site at the private human services program facility unless the student's IEP team determines that on-site services are required to meet the student's needs under federal law.
