MSD: Re-Entry Records, Prior Discipline Review, and Placement Coordination

A student re-entering the District from a charter, online, home, private, out-of-state, or other non-District educational setting shall provide records necessary for the District to determine appropriate placement, services, credit status, and safety supports. The school may review prior report cards, transcripts, withdrawal records, special education or Section 504 information, attendance records, citizenship or behavior records, and any legally available suspension, expulsion, juvenile-court, or safety-related information relevant to enrollment and placement.

If the student has been expelled from a public school within the prior twelve (12) months, enrollment may be denied when permitted by law, or the Superintendent or designee may approve enrollment subject to conditions and requirements determined appropriate for safety, services, discipline, attendance, and academic placement.
