MSD: Credit Evaluation Committee and Outside-Credit Review

For high school credit, graduation, eligibility, or transcript purposes, credit from an accredited school shall generally be accepted consistent with District policy and state law. Credit from a non-accredited school or outside instructional setting may be referred to a Credit Evaluation Committee appointed by the Superintendent. The committee may include the District Curriculum Director, a principal, a counselor, and other persons determined by the Superintendent.

The committee may review course descriptions, instructional materials, performance evidence, alignment with Utah standards, course length and attendance, grading criteria, teacher qualifications, student work, and other records. A home school parent is not required to produce such records for public school enrollment, but such documentation may be required when the parent requests that home school coursework be recorded for District transcript credit. Committee decisions and appeals shall follow the District's credit-review procedures preserved in Policy FBB and graduation-credit policies.
