MSD: Local Health Examination Coordination

In addition to the vision screening requirements stated in the USBA model, the District shall administer student health examinations in coordination with applicable Department of Health and Human Services rules, including vision, dental, abnormal curvature of the spine, and hearing examinations when required or offered by law. Qualified health professionals shall provide appropriate instruction, equipment, and materials for conducting the examinations.

Upon written request from a student's parent or guardian stating that a particular examination would violate the personal beliefs of the person making the request and of the student, the student shall be exempt from submitting to that examination when an exemption is allowed by law. The school shall provide written notice to the parent or guardian of any impairment disclosed by an examination.
