MSD: Enrollment, Kindergarten, and Immunization Record Coordination

Millard schools shall coordinate immunization records with the District's eligibility and admissions process. At registration or enrollment, schools may request an accurate and complete immunization record or a legally sufficient exemption or waiver, together with other required enrollment records. Kindergarten admission and preschool enrollment shall be coordinated with Policy FBAC and Policy FBA so that age, identity, residency, immunization, and health-screening documentation are handled consistently.

Evidence of immunization, immunity, exemption, or waiver shall be maintained and shared only as allowed by law. Except where state or federal law requires immediate enrollment or different treatment, students shall not be allowed to continue attending school without a compliant immunization record, exemption, conditional enrollment, or other legally authorized status under this policy.
