MSD: Student Drug Prevention, Intervention, and Voluntary Support Coordination

Each school's positive behaviors plan may coordinate with District student drug, alcohol, tobacco, and electronic cigarette policies to promote prevention, intervention, and voluntary support. The plan may recognize that prevention efforts give students additional reasons and skills to avoid drugs, alcohol, tobacco, electronic cigarettes, and controlled substances, and that intervention efforts may connect students and families with professional, parental, clerical, community, or school-based assistance.

If voluntary drug or alcohol testing or similar family-requested support is made available under a separate District program, it shall be administered as a support resource and not as general student discipline. Voluntary test results or support records shall remain confidential, shall not be placed in the student's academic record, and shall not be disclosed to law enforcement or juvenile authorities except as required by valid legal process or other applicable law. This subsection does not limit separate discipline, reporting, search, activity eligibility, safe school, or controlled-substance policies when those policies independently apply.
