MSD: Student Data Collection Notice and Parent Choice Coordination

The District may use a local Student Data Collection Notice, or a substantially similar annual notice, as an administrative tool to help parents and eligible students understand necessary student data, optional student data, prohibited collections, data sharing, and parent choices. The notice shall be kept consistent with this policy, the District metadata dictionary, the student data disclosure statement, FERPA, Utah student privacy law, and the District data governance plan.

The local notice does not authorize collection, sharing, or retention of student data beyond what this policy and law allow. If a conflict exists between the local notice and the controlling requirements of this policy, this policy and governing law control.
