MSD: Student Standards Files and Parent Acknowledgments

Each school and each organization sponsoring extracurricular activities, under the direction of the principal, shall develop written Student Standards, bylaws, disclosure documents, or student contracts governing student behavior in each extracurricular activity. Student Standards shall comply with District and school policy and may establish activity-specific expectations that exceed minimum District standards when those expectations are clear, reasonable, and communicated before participation.

Each school shall maintain a Student Standards file for each extracurricular activity it sponsors. Participating students and their parent or guardian shall sign an acknowledgment indicating that they have received the applicable Student Standards before participating and agree to comply with them. Advisors shall keep completed acknowledgments on file and shall enforce Student Standards in collaboration with the principal.
