MSD: Charter and Online Student Participation

Charter and online school students may participate in an extracurricular activity at a District school when the activity is not offered by the student's charter or online school, the student meets the District school's standards and requirements for participation, and the student's parent or guardian agrees to provide transportation to the District school for the activity.

The charter or online school of enrollment shall determine whether it will allow students to participate in extracurricular activities at a District school. The charter or online school shall cooperate fully with the District school regarding try-outs, practices, pep rallies, team fundraising efforts, scheduled games, required travel, and complete and prompt reports of student academic and citizenship progress or grades upon request.

The charter or online school shall pay a school participation fee of $75 per student to the District school for each school year in which the student participates. This fee is in addition to any student participation fee for a specific extracurricular activity and any activity fee charged to District students. All required fees shall be paid before participation, and if the participating student qualifies for fee waiver, the charter or online school of enrollment shall pay waived student participation fees to the District school before participation.
