MSD: Parent Assurances, Account Review, and Alternative Activities

Each school year, every student authorized to access District computers, networks, email services, internet access, or District-approved online instructional systems shall review the District student acceptable-use expectations as part of registration or another annual school process. Parents or legal guardians shall provide assurances that they and the student have reviewed the applicable policy expectations and agree to comply with them.

Parents may request reasonable alternative instructional activities for a student when the activity would otherwise require internet access or use of a District network account, subject to the instructional needs of the course and applicable law. Parents may also request review or termination of an individual student account where permitted by law and District technology procedures.
