MSD: Inadvertent Access, Revocation, and Law Enforcement Referral

A student who inadvertently accesses inappropriate, harmful, obscene, threatening, harassing, discriminatory, or otherwise prohibited material through District systems shall promptly report the access in the manner directed by the school. Student use of District technology remains a privilege subject to reasonable suspension, revocation, discipline, and referral to law enforcement when student use violates District policy or law.

Disciplinary responses shall be administered with notice and an opportunity to be heard consistent with applicable student discipline policies. Responses should be tailored to the conduct, the student's age and intent, the safety risk, and the need to restore appropriate use of District technology.
