MSD: Disability Transportation Discipline Coordination

Before a student is suspended from riding the bus, the administrator issuing discipline shall determine whether the student is entitled to transportation because of a disability by reviewing the student's Individualized Education Program or Section 504 plan. When transportation is a required related service or accommodation, discipline and transportation changes shall be administered only as permitted by applicable disability law, the student's IEP or Section 504 plan, and District discipline policy.

A bus privilege suspension may also affect field trips, athletic trips, and other special activities where District buses are used, but any such extension must be reviewed for consistency with student discipline, disability, activity, and transportation policies.
