MSD: Access to Students During School Hours and Law Enforcement Coordination

School personnel and District personnel may meet with students as needed to provide education-related services, student support, counseling, discipline administration, safety review, or other school-related functions. When a student receives formal discipline, such as suspension, or when the student's health or safety may be at risk, school personnel shall contact the parent or guardian after communicating with the student, unless another legally controlling investigation protocol applies.

When a school or District administrator reasonably suspects that unlawful activity has been committed by a student, the School Resource Officer or the Millard County Sheriff's Department may be called to investigate. Law enforcement officers follow their agency protocols for contacting parents or guardians regarding an investigation. Outside governmental or private entities may not use schools merely as a convenient forum to locate or interview students; requests for interviews with pupils during school hours shall be made through the principal, who will determine whether the interview is appropriate under the circumstances and applicable law.
