# MSD: Student Dress, Privacy, and Modesty Coordination

Schools shall administer site-specific student dress standards in a manner that supports student privacy, personal modesty, safety, non-discrimination, and access to instruction. Site dress standards should be developed with community input and reviewed at least every other year with the school community council. Students should be able to dress comfortably for school without unnecessary discipline or body shaming, while remaining fully dressed in clothing that covers nudity, partial nudity, and undergarments.

When a student's attire does not meet applicable dress guidelines, the student should be offered the opportunity to modify the attire or borrow clothing provided by the school before additional discipline is considered. Parents shall be contacted when dress-related concerns require administrative discipline or repeated intervention.
