MSD: Recording and Remote Monitoring in Private Areas

Students, guests, employees, and volunteers may not use electronic devices in a manner that invades the reasonable privacy expectations of others in private areas such as locker rooms, washrooms, dressing rooms, restrooms, or changing areas. Still photography, video recording, audio recording, livestreaming, or remote monitoring in such areas is prohibited except as expressly authorized by law and District policy.

The prohibition also includes the use of an electronic device carried by a student that allows a parent, guest, or other person to monitor the student and surrounding students or staff through audio or video means during school or school-sponsored activities.
