MSD: Student Standards, Activity Discipline, and Safe School Coordination

Each school and each organization sponsoring extracurricular activities shall maintain a Student Standards file for the activity it sponsors. Participating students and their parents or guardians shall acknowledge the applicable standards before participation, and the advisor, in collaboration with the principal, shall enforce appropriate action when an infraction occurs. Activity standards may exceed District minimum standards when they are consistent with Board policy, UHSAA requirements, state and federal law, and student due process.

A student who violates this Safe Schools policy may be disciplined under the USBA model provisions above and may also lose or be limited in extracurricular participation under the District student activities policies. This local provision preserves the Board-approved connection between safe school conduct, extracurricular participation, student standards files, and principal/advisor enforcement.
