MSD: Non-Punitive Eligibility Consequences, Assessment, Confidentiality, and Voluntary Testing

Drug testing under MSD Policy 6230 is an extracurricular eligibility program and is not used for academic discipline. Positive results are used to determine eligibility to participate in extracurricular activities and shall not be documented in the student's academic record. Test results shall be kept confidential among authorized District officials, the student, and the student's parent or legal guardian, and shall not be disclosed to law enforcement or juvenile authorities except under a valid subpoena or other binding legal process.

A student or parent may contest a positive test result within the time and process established by the District. Consequences for positive test results include activity suspension, required assessment by a licensed substance abuse intervention or treatment provider, follow-up requirements, and a negative sample before reinstatement. Positive results are cumulative during the student's career in Millard School District and carry over from year to year.

The District may also provide voluntary drug testing at parent request. Voluntary testing is offered solely for the information of the parent or guardian, is confidential, is not placed in the student's school record, and does not result in legal or criminal action by the District.
