MSD: Coordination with Student Records and Government Data Privacy Policies

Requests for records shall be routed according to the subject matter of the record. Student education records are governed by FERPA and the District student records and student data protection policies, rather than by ordinary GRAMA public records treatment. Personal data of individuals other than students shall also be coordinated with the District Government Data Privacy policy. This local coordination provision does not alter the access, denial, segregation, appeal, amendment, fee, or retention procedures contained in the USBA GA model.
