MSD: Classroom Visitors, Student Visitors, and Younger Children

Visitor access to instructional areas shall be administered in a manner that protects instruction, student privacy, safety, and orderly school operation. Students from schools outside Millard School District may not attend or visit District schools during the instructional day except as authorized by District policy, school administration, or an approved program or activity.

Children under school age may not visit in a classroom except by special invitation or approval from the principal or designee. Any approved visit shall be supervised and limited so that the visit does not interfere with instruction or create a safety, privacy, or supervision concern.
