MSD: Support Group Use of District Name, Students, and School Resources

A community support group may use school names, logos, communication channels, students, school personnel, or District facilities only as authorized by the Superintendent, principal, or applicable District policy. Any authorized communication or fundraising use shall make clear whether the activity is District-sponsored, school-sponsored, or independently operated by the support group.

Student participation in support group fundraising or activities shall be administered consistently with student-fee, fee-waiver, activity-eligibility, student-safety, and nondiscrimination requirements. A support group may not require student participation in a manner that conflicts with District policy or state law.
