MSD: Parent/Guardian Notice and Cross-Policy Routing

Each student's parent or guardian shall receive annual notice of parental rights and school responsibilities relating to academic accommodations. The notice may be provided through the District website, school website, registration materials, student handbooks, electronic communication, or another method reasonably calculated to inform parents and guardians.

Requests under this policy shall be routed to the principal or designee and considered individually. Where a request overlaps another policy area, including assessment exclusion, parent-teacher conferences, class observation, student discipline notice, attendance-related accommodations, specialized placement, or student records, the school shall coordinate the request with the corresponding USBA-format policy while preserving the parent or guardian's right to a reasonable accommodation.

This local provision does not narrow the rights in the USBA model. It preserves Millard's prior practice of giving annual notice, recognizing parent or guardian participation, and routing parent-rights issues to the proper policy location.
