MSD: Instructional Material Review and Public Access Coordination

Parent access to District instructional material shall be administered in coordination with the District's instructional-material adoption, selection, review, and appeal procedures. Recommended primary instructional materials should be made available for public review as required by the applicable instructional-material policy before Board adoption or approval.

Questions or concerns about instructional material, supplemental material, library material, sensitive material, online or digital learning material, or other learning material shall be routed to the policy that governs the specific material type and review process. Access to material under this policy does not replace copyright limits, student privacy requirements, vendor contract restrictions, or the review procedures established for challenged instructional or library materials.

This local provision preserves the connection between parent access, public review before adoption, instructional-material selection, library-material review, and District website or physical-location access for material that cannot legally or practically be posted online.
