MSD: Parent Notice and Directory Information Opt-Out for Recruiter Requests

When a high school receives a proper request from military recruiters or institutions of higher education for student directory information, District administration shall coordinate disclosure with the District's student records, directory information, parent notice, and privacy policies. Parents shall be notified that names, addresses, and telephone numbers of juniors and seniors may be released unless a written opt-out request is submitted to the Superintendent or designee by the District-established annual deadline.

This provision preserves Millard's local parent-notice and opt-out practice while leaving the current USBA recruiter-access and ASVAB-result reporting language in control.
