MSD: Recruiter Scheduling and Active Recruiting Controls

Military recruiters and representatives of institutions of higher education shall receive the access required by law and this policy. Active recruiting contacts should be coordinated through the high school administration or counseling office, and recruiting personnel should schedule appointments before meeting with counselors, teachers, or administrators.

Active recruiting with individual students should occur before or after school hours unless the activity is part of a designated career fair, job fair, or other school-approved informational event. Nothing in this local provision restricts the equal-access requirement established by federal law and the USBA model.
