MSD: Training Departure and ASVAB Follow-Up Coordination

Students leaving for military-related training are encouraged to do so during summer vacation when practicable. If a student requests to leave school for training during the school year, the school shall coordinate with the student, parent or guardian, recruiter, counselor, principal, and District administration to determine whether a cooperative education agreement, credit plan, leave arrangement, or Board review is needed.

The ASVAB may be offered to juniors and seniors. Testing personnel may return to the school, with principal approval, to explain test results to students in a manner consistent with the ASVAB reporting option selected under this policy and with parent/student notice requirements.
