MSD: Coordination with Staff Training, Reporting Duties, and Evidence of Compliance

Parent education provided under this policy shall be coordinated with District staff training and mandatory reporting procedures regarding child sexual abuse, neglect, human trafficking, and commercial sexual exploitation. Administrators should ensure that parent-facing education, staff training, approved instructional materials, and mandatory reporting guidance are aligned and not administered as isolated programs.

The District shall retain evidence of compliance with required training and approved instructional-material obligations in a manner that allows the District to respond to State Board of Education requests and internal compliance reviews.
