MSD: Emergency Notification and Re-Entry Coordination for Released-Time Students

The District emergency response plan should include, to the extent practicable, procedures to notify a student who is off campus at the time of a school violence emergency or other school emergency because the student is excused from school for released-time religious instruction or another approved released-time activity.

Schools may coordinate with parents, students, released-time providers, public safety officials, and District administration regarding emergency notification, re-entry, reunification, and supervision, provided that such coordination does not commingle public school operations with religious instruction, require District personnel to regulate released-time attendance, or use school resources to support a released-time program beyond what is allowed by law.
